

# D100 Series Vacuum Ejector

**Mono-Vac** is the result of continuing evolution of the popular D Series. It is a Single Venturi device designed and manufactured for the most demanding applications where reliability and environmental concerns are critical.

## Features:

- ALL BRASS CONSTRUCTION
- HIGH EFFICIENCY
- NO MOVING PARTS
- OVERSIZED PORTING FOR MAXIMUM FLOW

The Mono-Vac Series of generators is rugged and dependable. The all brass construction is perfect for harsh environments. The Single Stage design has no moving parts thus provides impressive reliability and longevity. High performance is here too. PVI's unique full circle generation feature coupled with oversized porting and a series of multiple internal expansion chambers maximize flow performance. The Mono-Vac gives the maximum performance available for single stage generation.

## Models:

Part #	Air Consumption @ 80psi	Vacuum Level @80psi
D100-H10-80-B	11.5 scfm	25 in-hg
D100-M10-80-B	11.5 scfm	18 in-hg
D100-H12-80-B	18.6 scfm	25 in-hg
D100-M12-80-B	18.6 scfm	18 in-hg
D100-H14-80-B	25.5 scfm	25 in-hg
D100-M14-80-B	25.5 scfm	18 in-hg

Stainless Steel construction available as a -S option.  
60 psi operation available. Substitute 80 with 60.
